

# How StoreEase Streamlined Facility Transitions and Scaled Operations with Storable

## BACKGROUND

**StoreEase** is revolutionizing self-storage through virtual management and facility automation. With a patented technology platform that enables contactless operations across hundreds of locations, finding the right facility management software partner was crucial to their expansion strategy.

## THE CHALLENGE

StoreEase faced a monumental task: efficiently transitioning and launching hundreds of facilities while maintaining consistent quality across their portfolio. This required a modern, scalable solution that could handle complex implementations without sacrificing attention to detail.

*"I've transitioned close to 750 facilities throughout my career, working with various management platforms. Recently, we've launched close to 50 facilities on Storable's StorEDGE platform alone. With each transition, maintaining quality while scaling operations has been crucial to our success."*

- Missy Fuhrman  
V.P. of Transitions  
at StoreEase

## POWERING GROWTH THROUGH STRATEGIC PARTNERSHIP

After extensive experience with multiple platforms, StoreEase deepened their partnership with Storable, recognizing the company's commitment to continuous improvement in implementation services. The decision was driven by Storable's enhanced onboarding process, which offered:

- Personalized support from dedicated specialists
- Comprehensive project visibility
- Efficient task management systems
- Advanced template capabilities for rapid scaling
- Streamlined data migration processes

## TRANSFORMATION INTO ACTION

"The entire facility onboarding process has been transformed," explains Missy. "Not only is implementation smooth and seamless, but the level of support and visibility we now have has reimagined how we manage transitions. Having a dedicated team that responds quickly has made scaling our operations significantly more efficient."

# DO MORE

WITH  
STORABLE SOFTWARE

## MEASURABLE IMPACT

The partnership with Storable has transformed StoreEase's ability to scale, delivering concrete results across their portfolio:

- Successfully manage dozens of facility transitions
- Dramatically reduced implementation timelines through templated processes
- Achieved seamless scaling of operations across multiple locations
- Enhanced team productivity through streamlined communication
- Established a repeatable framework for future growth

## READY TO TRANSFORM YOUR SELF-STORAGE OPERATIONS??

The partnership's impact was immediately evident across three key areas:

### ENHANCED COMMUNICATION

- Single dashboard providing complete portfolio visibility
- Integrated support channels for quick issue resolution
- Strategic milestone tracking and notifications
- Direct access to implementation specialists

### OPERATIONAL EXCELLENCE

- Capability to manage multiple facility transitions simultaneously
- Significant reduction in redundant tasks through templating
- Simplified data migration workflows
- Clear task ownership and timeline tracking

### TEAM EFFICIENCY

- Rapid response times from support team
- Seamless facility onboarding process
- Well-defined responsibility allocation
- Enhanced project timeline visibility

## Building the Future of Self-Storage

With an aggressive growth strategy in place, StoreEase sees their partnership with Storable as a cornerstone of their future success. The refined implementation process has given them the foundation needed to confidently pursue new opportunities while maintaining their high operational standards.

"Storable continues to raise the bar with the services offered to their customers," Missy emphasized. "Their commitment to innovation and support has made them an invaluable partner in our growth journey."
